Contract award Malaysian Sea Surveillance System Upgrade by Malaysian Maritime Enforcement Agency

Malaysian Maritime Enforcement Agency (MMEA), the recently formed Coast Guard administration, has awarded Sofrelog and its local partner Puncak Teknologi Sdn Bhd, the contract for the modernisation of the Malaysian Sea Surveillance System (MSSS). As the result of an international tender, the parties have been selected to modernise the existing system and to enhance it with new capabilities.

The MSSS is responsible for the surveillance of the Malacca Strait between Malaysia, Indonesia and Singapore. This covers the 900km of coast between the border of Thailand and the port of Singapore. The missions of the operators include both, the organisation of the traffic in these very busy waters by means of VTMS, and the surveillance of security and other illegal activities making this region famous.

The system will integrate the existing 9 radars and AIS network.

The radio communications system will also be renewed and will be highly integrated with the operator workstations for facilitating its day to day use.

The system is operated 24 hours a day to monitor the commercial traffic as well as the numerous small craft in the area.

All traffic data are recorded on the system's server and can be synchronously replayed for incident analysis.

An extensive database of information, that is collected by the operators and various sub-systems, is also available to authorities.

The modular design of the SYTAR technology will also permit seamless future expansion plans.

SOFRELOG is a High Technology company with major offices in France and the United States. The company installed its first Vessel Traffic Services system in 1993, based on experience in the field of software real-time processing for government agencies.

Founded in 1987, SOFRELOG (www.sofrelog.com) is an employee-owned high technology company which employs more than 70 engineers, technical and administration personnel. Primary customers are port and waterway authorities, coast guards and other government agencies as well as commercial companies.
